- udev rules
- Wake on LAN (WoL)
- Home automation
- rsync backup to a Synology NAS
- rclone backup to Cloud Storage

Advanced EmulationStation

- EmulationStation Menu Trees
- Game Collection Settings
- ES systems customization
- ES command line arguments
- Latency reduction and optimizing performance
- Pacman (package manager)

Scripting

- Batocera scripts
- Usage of batocera-settings
- Scripting function keys
- Batocera Services
- Scripts for pcmanFM

Development

- Batocera's file partitions
- Coding rules
- Make a PR to batocera.linux
- Github Desktop
- TortoiseGit (Windows 7/10/11 x86/x64/ARM)
- Overlays (modify the live system)
- Notable files/folders
- Compile batocera-linux
- Compiling individual packages
- Redirect upgrades from any board to my own builds
- Create your own pacman package
- Write themes for batocera-emulationstation

- Help with translation
- Evmapy (keyboard shortcuts)
- Evsieve (input manipulator)
- Debug Batocera

Documentation Contribution

- Good wiki editing practices
- System page template
- DokuWiki syntax
- Batocera-specific wiki code snippets
- Pending approvals
- Batocera blog writing guide
- Benchmarking for Batocera guide

About

- Wiki homepage
- Batocera main website
- License/artwork
