

update rc.html to make visibility on what to test

```
# to update https://mirrors.o2switch.fr/batocera/rc.html
# this is the list of ready rc images not yet relased.
# update it whe new images are released with:
connect on mirrors.o2switch.fr and execute ./listRC.sh
```

release some images

```
# connect on mirrors.o2switch.fr
1) ./doRelease.sh rk3326 39
2) ./listInstalls.sh # update list of install files (to install from
batocera) (https://mirrors.o2switch.fr/batocera/installs.txt)
3) ./listRC.sh # reupdate rc.html

# on the website
4) updateImages.sh
```

update the changelog

```
# generate and copy the changelog on the website (remove any lines from the
next version already present)
~/git/batocera.linux$ python3 ./scripts/linux/convertChangelog.py <
./batocera-Changelog.md > changelog-content.html
```

update the last version file

```
includes/config.php
```

add new boards

see images/download and include/boards.php to add some new boards on the website.
