- [Themes for EmulationStation](#)
- [License](#)

Emulators & Ports

- [Emulators](#)
- [Ports](#)
- [Easy & Advanced Arcade \(Mame, FbNeo, others\)](#)
- [CD Image formats](#)
- [Netplay](#)

Advanced users

- [SSH and console access](#)
- [Store games on a NAS](#)
- [Fix internet access for Kodi](#)
- [Store games on a second USB/SATA drive](#)
- [Upgrade manually](#)
- [Display issues and resolution changes](#)
- [Customize decorations \(bezels\)](#)
- [Splash boot](#)
- [Bluetooth Controllers - manual setup](#)
- [Advanced Retroarch settings](#)
- [Timezone](#)
- [pacman Package Manager](#)
- [VPN client](#)

Support

- [Troubleshooting](#)
- [Supported hardware](#)
- [Supported and unsupported emulators](#)

Basic How To's

- [Install Batocera](#)
- [Current and previous releases](#)

Raspberry Pi only

- [Retroflag GPicase](#)
- [Add Powerdevices \(RPi only\)](#)
- [Method to not lose SRM states and other \(meta-\)data](#)

Development side

- [Compile batocera.linux](#)
- [Coding rules](#)
- [batocera.linux architecture](#)
- [Modify the system while it's running](#)
- [How to work on batocera.linux \(and not recompile everything\)](#)
- [Write themes for EmulationStation \(Batocera version\)](#)
- [Redirect upgrades from any board to my own builds](#)
- [Diagnose joysticks issues](#)
- [Dual boot Ubuntu/batocera.linux](#)
- [Help with translation](#)

Scripting

- [Script events on Starting/Ending a game](#)
- [Usage of batocera-settings](#)
- [Wiki code snippets](#)
