Game files

You'll need access to the data from the original game. If you don't have an original CD then you can

buy Diablo from GoG.com. Alternately you can use `spawn.mpq` from the shareware version, in place of `DIABDAT.MPQ`, to play the shareware portion of the game.

Copy DIABDAT.MPQ from the CD or GOG-installation (or extract it from the GoG installer) to the `/userdata/roms/devilutionx/` folder.

To run the Diablo: Hellfire expansion you will need to also copy `hellfire.mpq`, `hfmonk.mpq`, `hfmusic.mpq`, `hfvoice.mpq`.
