Amstrad GX4000

The Amstrad GX4000 is a third generation videogame console developed by Amstrad. It was released in 1990, retailing for £99.99 (around \$240 USD adjusted for inflation by 2022). Its hardware was based on the then-popular [Amstrad CPC Plus](#) computer, and so was compatible with many of its titles. It did not have a keyboard, so any keyboard-based titles were lacking controls (but the original computer had a joystick controller which many games used).

Despite initially earning favorable reviews, it was Amstrad's first and last attempt at entering the console market.

This system scrapes metadata for the “gx4000” group(s) and loads the gx4000 set from the currently selected theme, if available.

Quick reference

- **Emulator:** [RetroArch](#)
- **Core:** [libretro: cap32](#)
- **Folder:** /userdata/roms/gx4000
- **Accepted ROM formats:** .dsk, .m3u, .cpr, .zip, .7z

BIOS

No Amstrad GX4000 emulator in Batocera needs a BIOS file to run.

ROMs

Place your Amstrad GX4000 ROMs in /userdata/roms/gx4000.

Emulators

RetroArch

[RetroArch](#) (formerly SSNES), is a ubiquitous frontend that can run multiple “cores”, which are essentially the emulators themselves. The most common cores use the [libretro](#) API, so that's why cores run in RetroArch in Batocera are referred to as “libretro: (core name)”. RetroArch aims to unify the feature set of all libretro cores and offer a universal, familiar interface independent of platform.

RetroArch configuration

RetroArch offers a **Quick Menu** accessed by pressing [HOTKEY] +  which can be used to alter various things like [RetroArch and core options](#), and [controller mapping](#). Most RetroArch related settings can be altered from Batocera's EmulationStation.

Standardized features available to all libretro cores: `gx4000.videomode`, `gx4000.ratio`, `gx4000.smooth`, `gx4000.shaders`, `gx4000.pixel_perfect`, `gx4000.decoration`, `gx4000.game_translation`

ES setting name batocera.conf_key	Description ⇒ ES option key_value
Settings that apply to all cores of this emulator	
GRAPHICS API <code>gx4000.gfxbackend</code>	Choose which graphics API library to use. Vulkan is better, when supported. ⇒ OpenGL <code>opengl</code> , Vulkan <code>vulkan</code> .
AUDIO LATENCY <code>gx4000.audio_latency</code>	In milliseconds. Can reduce crackling/cutting out. ⇒ 256 256, 192 192, 128 128, 64 64, 32 32, 16 16, 8 8.
THREADED VIDEO <code>gx4000.video_threaded</code>	Improves performance at the cost of latency and more video stuttering. ⇒ On <code>true</code> , Off <code>false</code> .

libretro: cap32

[Caprice32](#) is a software emulator of the Amstrad CPC 8bit home computer series running on Linux and Windows. The emulator faithfully imitates the CPC464, CPC664, CPC6128, CPC6128+ and GX4000 models. This is the [libretro port](#) of it.

libretro: cap32 configuration

ES setting name batocera.conf_key	Description ⇒ ES option key_value
Settings that apply to all systems this core supports	
CPC MODEL <code>global.cap32_model</code>	⇒ 464 464, 6128 6128, 6128+ 6128+.
EMULATED RAM SIZE <code>global.cap32_ram</code>	⇒ 64KB 64, 128KB 128, 192+KB 192, 512KB 512, 576+KB 576.

Controls

Here are the default Amstrad GX4000's controls shown on a [Batocera RetroPad](#):

RetroPad	Amstrad Joystick
	FIRE1
	FIRE2
	SPACE
	S
[START]	J (to select Joy in games)
Up	JOY UP
Down	JOY DOWN
Left	JOY LEFT
Right	JOY RIGHT
L1	INTRO
R1	SHIFT
L2	CTRL
R2	COPY
