Mega Duck

The Mega Duck is a portable developed by Welback Holdings. It was released in 1993.

Also known as:

- Creatronic
- Videojet
- Cougar Boy
- Mega Duck Super Junior Computer
- Super QuiQue

This system scrapes metadata for the “megaduck” group and loads the megaduck set from the currently selected theme, if available.

Quick reference

- **Emulator:** MAME
- **Folder:** /userdata/roms/megaduck
- **Accepted ROM formats:** .bin, .zip, .7z

BIOS

No Mega Duck emulator in Batocera needs a BIOS file to run.

ROMs

Place your Mega Duck ROMs in /userdata/roms/megaduck.

Emulators

MAME

**MAME**, the Multiple Arcade Machine Emulator, is a multi-purpose emulation framework which facilitates the emulation of vintage hardware and software. Originally targeting vintage arcade
machines, MAME has since absorbed the sister-project MESS (Multi Emulator Super System) to support a wide variety of vintage computers, video game consoles and calculators as well. MAME doesn't use an individual “core” for each system like RetroArch does, instead the ROM itself usually contains the necessary information to accurately emulate it, thus making it specific to the version of MAME it was made for. Overall it's a very complicated subject, we have a guide specific to arcade just for it.

**MAME configuration**

MAME offers a Menu in-game ([HOTKEY] + 🍊 or [Tab] on the keyboard). This can be used to manually adjust inputs or game settings. If you're having issues with a specific game, check the MAMEdev FAQ for that game here. For MESS systems specifically, you might find more information on MESS's wiki. All options can also be edited by opening the mame.ini file.

Standardized features available to all versions of this emulator: megaduck.videomode, megaduck.decoration, megaduck.padtokeyboard

<table>
<thead>
<tr>
<th>ES setting name batocera.conf_key</th>
<th>Description ⇒ ES option key_value</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>VIDEO MODE megaduck.video</strong></td>
<td>BGFX for post-processing, accel/opengl for raw image. ⇒ BGFX bgfx, Accel accel, OpenGL opengl.</td>
</tr>
<tr>
<td><strong>BGFX GRAPHICS API megaduck.bgfxbackend</strong></td>
<td>Depends on video mode being set to BGFX. Vulkan is better, when supported. ⇒ MAME Detect automatic, OpenGL opengl, OpenGL ES gls, Vulkan vulkan.</td>
</tr>
<tr>
<td><strong>BGFX VIDEO FILTER megaduck.bgfxshaders</strong></td>
<td>Apply a post-processing effect. ⇒ Off None, Bilinear default, CRT Geom crt-geom, CRT Geom Deluxe crt-geom-deluxe, Super Eagle eagle, HLSL hlsl, HQ2X hq2x, HQ3X hq3x, HQ4X hq4x.</td>
</tr>
<tr>
<td><strong>CRT SWITCHRES megaduck.switchres</strong></td>
<td>Allows the use of switchres profiles if present. ⇒ Off 0, On 1.</td>
</tr>
<tr>
<td><strong>VERTICAL ROTATION (TATE) megaduck.rotation</strong></td>
<td>Rotates screen by 90 degrees. Intended for rotating displays. ⇒ Off None, Rotate 90 autoror, Rotate 270 autorol.</td>
</tr>
<tr>
<td><strong>ALT DPAD MODE megaduck.altdpad</strong></td>
<td>If the D-Pad is oriented incorrectly for your controller. ⇒ Off (Default) 0, DS3 Orientation 1, X360 Orientation 2.</td>
</tr>
</tbody>
</table>

**Controls**

Here are the default Mega Duck's controls shown on a Batocera RetroPad:
Troubleshooting

Further troubleshooting

For problems with MAME specifically, there are some tips on the troubleshooting section on MAME's system page.

For further troubleshooting, refer to the generic support pages.
