Oric Atmos

Oric was a brand of home computers sold in the 1980s by Tangerine Computer Systems, a United Kingdom-based company, which was popular primarily in Europe.

In 1984 the Oric Atmos was launched and became their most successful computer, an 8-bit computer with a MOS 6502A CPU running at 1 MHz and 16kB of RAM.

ROMs

Place your Oric tapes or disk ROMs in `/userdata/roms/oricatmos`.

The CLK emulator requires the Basic1.1 ROM listed above.

Emulators

CLK

CLK aka Clock Signal is a multi-system emulator that is focused on low-latency emulation. It emulates both Oric Atmos and its predecessor Oric 1 (and a bunch of other old computers).

Controls

Most Oric games are played with the keyboard. There is a minimal pad2key configuration provided, but if you use only a joystick, you will most probably have to remap the keyboard to play your game.
