

DOOM

Emulator	ROM Folder	Extension	BIOS	Config
lr-prboom	/userdata/roms/prboom	.wad	prboom.wad	/userdata/saves/prboom/[DOOM-EPISODE]/prboom.cfg

Batocera is shipped with the SHAREWARE version of Doom. So you can play Episode 1 of this insane 3rd person shooter from 1993.

When adding .wad files, make sure you put the filenames in lowercase. Uppercase .WAD won't work.

Wiggle Fix

On some ARM platforms floor and ceilings got some disturbtive graphics output. Disabling it completely gets rid of the effect. This screenshot illustrates the problem at full effect! This is due to some fix for texture "vibrations" (not exactly the same issue as the wiggle but triggered with the same option) the fix was backported from prboom-plus but it seems it's causing trouble in some platforms.

So how to fix? Start PRBOOM → Options → General → 3rd page Whiggle fix → No

Another method? Yes, navigate to /userdata/saves/prboom/[D00M-EPISODE]/prboom.cfg and search Video Section for *r_wiggle_fix* and disable it.

```
## Video settings
#screenblocks 0
#usegamma 0
#uncapped_framerate 3
#filter_wall 1
#filter_floor 1
#filter_sprite 1
#filter_z 1
#filter_patch 1
```

#filter_threshold	49152
#sprite_edges	0
#patch_edges	0
#render_stretchsky	1
r_wiggle_fix	0

Add Additional WADs (PWADs)

General: IWAD = Internal Where's All the Data and PWAD = Patch Where's All the Data.

So in general IWADs are standalone files and can be started by themselves. They MUST NOT be renamed.

Known IWADs so far:

GAME NAME	WAD NAME	md5
Doom v1.9	doom.wad	cd63c5ddff1bf8ce844237f580e9cf3
Doom - TNT Evilution v1.9	tnt.wad	4e158d9953c79ccf97bd0663244cc6b6
Doom 2 Hell on Earth v1.9	doom2.wad	25e1459ca71d321525f84628f45ca8cd
Doom 2 - Plutonia Experiment	plutonia.wad	75c8cf89566741fa9d22447604053bd7
Ultimate Doom	doomu.wad	c4fe9fd920207691a9f493668e0a2083
FreeDoom Part1 (Doom Ultimate free plot)	freedom1.wad	91DE79621A393A08C39A9AB2C034B766
FreeDoom Part2 (Doom2 free plot)	freedom2.wad	DD9C9E73F5F50D3778C85573CD08D9A4

PWADs can be renamed. Some example of known PWADs:

GAME NAME	(P)WAD NAME	IWAD ASSOCIATED	MD5
Doom 1 Episode 5 - SIGIL free on https://romero.com/	SIGIL_v1_21.WAD	doom1.wad	743d6323cb2b9be24c258ff0fc350883
Doom 2 - No Rest for the Living	nerve.wad	doom2.wad	967D5AE23DAF45196212AE1B605DA3B0
Goldeneye 007	goldeneye.wad	doom2.wad	EF1E338364A1196533635698AF997A94

File Management

I suggest creating multiple folders for each IWAD like :

```
roms\prboom\Doom
roms\prboom\Doom 2
roms\prboom\Doom Ultimate
...
```

In each of these folder, just put the IWAD associated in it.

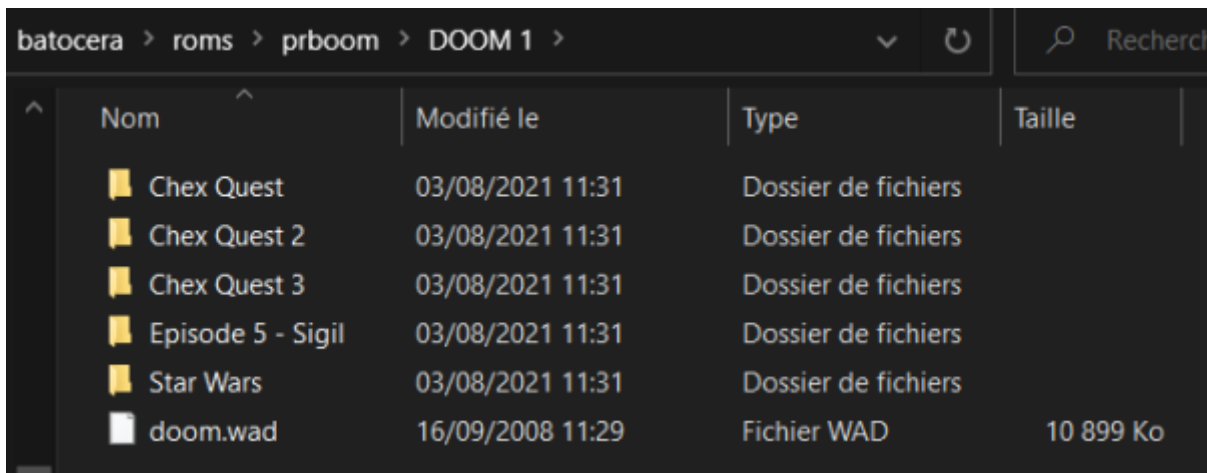

```
roms\prboom\Doom\doom.wad
```

```
roms\prboom\Doom 2\doom2.wad
roms\prboom\Doom Ultimate\doomu.wad
...
```

Now if you are going to use some mods and PWAD, just do a folder in the associated IWAD. For example:

```
roms\prboom\Doom\doom.wad
roms\prboom\Doom\Chex Quest\CHEX.wad
roms\prboom\Doom\Episode 5 - Sigil\SIGIL_v1_21.wad
...
```

That way, PWADs will use the main IWAD file in their parent folder.

Tweaking options

PrBoom allows to use a prboom.cfg file to apply to games recursively.

So if you put a prboom.cfg in \roms\prboom\prboom.cfg, it will apply to every game in roms\prboom\ and subfolders.

For example, I noticed that most WAD mods have a too low brightness. In order to fix that, you can create a prboom.cfg file with Video→usegamma 0/1/2/3/4.

```
# Doom config file
#
# Format:
# variable value
#
# Lines starting with '#' are comments
# When saved, default values are commented out

## Misc settings
#default_compatibility_level -1
#menu_background 1
#max_player_corpse 32
#flashing_hom 0
```

```
#demo_insurance                2
#level_precache                 0
#demo_smoothturns              0
#demo_smoothturnsfactor       6

Other examples for specific WADs

Sigil (5th Episode)

SIGIL is the 5th Episode for ULTIMATE DOOM. It was created by the creator of DOOM - John Romero and can be [downloaded for free right here](#).

How to use?

Place the downloaded WAD to your prboom directory in roms. Now edit /userdata/saves/prboom/[DOOM1-EPISODE]/prboom.cfg and set the WAD next to be loaded to the main WAD in *Files Section*. I've only tested for ULTIMATE DOOM and it worked like a charme.

```
## Files
wadfile_1          "SIGIL_v1_2.wad"
#wadfile_2         ""
#wadfile_3         ""
#wadfile_4         ""
#wadfile_5         ""
#wadfile_6         ""
#wadfile_7         ""
#wadfile_8         ""
#dehfile_1         ""
#dehfile_2         ""
```

Lost Episodes of Doom

The Lost Episodes of Doom is a collection of three eight-level episodes for Doom by Christen Klie and Bob Carter. It takes place on the Jovian moons Callisto and Io, and on Jupiter itself. It was a commercial product.

Extract the two WAD files and then edit `/userdata/saves/prboom/[DOOM1-EPISODE]/prboom.cfg` and set the WAD next to be loaded to the main WAD in *Files Section*.

```
## Files
wadfile_1          "JPTR_V40.WAD"
wadfile_2          "Jptr_fix.wad"
#wadfile_3         ""
#wadfile_4         ""
#wadfile_5         ""
#wadfile_6         ""
#wadfile_7         ""
#wadfile_8         ""
#dehfile_1         ""
#dehfile_2         ""
```

Doom 2 - No Rest for the Living

No Rest for the Living was developed by Nerve Software for the release of Doom 2 on the XBLA. The episode consists of nine levels in all, eight standard levels and a single secret level, as a homage to the similarly structured nine-map episodes in the original Doom, particularly Knee-Deep in the Dead.

Extract the WAD file and then edit `/userdata/saves/prboom/[DOOM2-EPISODE]/prboom.cfg` and set the WAD next to be loaded to the main WAD in *Files Section*.

```
## Files
wadfile_1          "NERVE.WAD"
#wadfile_2         ""
#wadfile_3         ""
#wadfile_4         ""
#wadfile_5         ""
#wadfile_6         ""
#wadfile_7         ""
#wadfile_8         ""
#dehfile_1         ""
#dehfile_2         ""
```

Additional tricks

The above methods got the disadvantage that you “lose” your original gameset. That means for DOOM-Sigil that you will the new launching screen ever and ever again. To get rid of this you can copy the main WAD and rename one to `DOOM - Ultimate DOOM.wad` and the other to `DOOM - Sigil of Baphomet.wad` now you edit `/userdata/saves/prboom/DOOM - Sigil of`

Baphomet.wad/prboom.cfg and set it up like written above.

Now you edit gamedata and hide the added PWAD files (Sigil.wad), you now have a clean list.

Enhanced music

PrBoom can let you add enhanced music, like back in the 90s when using a SC-55 synthesizer to render the music tracks. Some of these tunes have been recorded and can be found on the Internet (Google is your friend).

Once you downloaded the tracks that you want to add, you need to update the config file from the Doom game you want to change musics for. Its location follows always the same pattern, for example /userdata/saves/prboom/[DOOM1-EPISODE]/prboom.cfg/prboom.cfg for DOOM1. You need to add/modify the section:

```
## Music
#mus_bunny          "bunny.mp3"
#mus_e1m1           "e1m1.mp3"
#mus_e1m2           "e1m2.mp3"
#mus_e1m3           "e1m3.mp3"
...
```
