Spectravideo

Spectravideo was a brand of home computers and peripherals that gained popularity in the early 1980s. The company initially started as a manufacturer of video game consoles and accessories before transitioning to producing home computers. Notable models included the SV-318 and SV-328, which were known for their robust build and compatibility with MSX software, a standardized home computer architecture. Spectravideo computers were particularly popular in Europe and played a significant role in the home computing boom of the 1980s.

This system scrapes metadata for the `spectravideo` group and loads the `spectravideo` set from the currently selected theme, if available.

Quick reference

- **Accepted ROM formats:** `.zip`, `.7z`, `.cas`
- **Folder:** `/userdata/roms/spectravideo`

Emulators
openmsx

BIOS

No Spectravideo emulator in Batocera needs a BIOS file to run.

ROMs

Place your Spectravideo ROMs in `/userdata/roms/spectravideo/`.

Emulators

openmsx

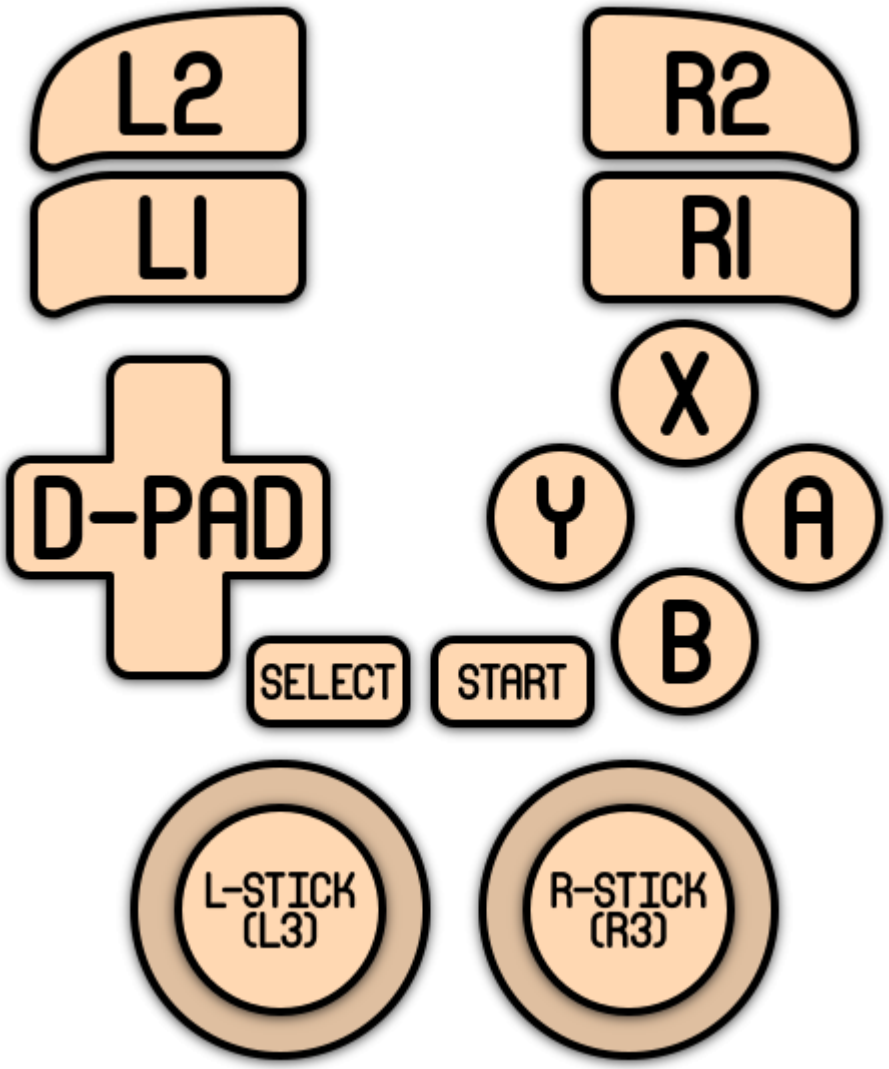

openmsx configuration

Standardized features available to all cores of this emulator: `msx1.videomode`, `msx1.padtokeyboard`, `msx1.videomode`, `msx1.bezel`, `msx1.bezel_stretch`, `msx1.hud`, `msx1.bezel.tattoo`, `msx1.bezel.tattoo_corner`, `msx1.bezel.tattoo_file`, `msx1.bezel.resize_tattoo`

Controls

The default button mapping for the <system shortname>'s controls is as follows::

Embed a large image showing the controller's mapping. There should be one available for the system at https://github.com/batocera-linux/batocera-controller-overlays/tree/master/solid-4k . In case it hasn't been created yet, the controller pictures at docs.libretro for the system generally share the same layouts.

Troubleshooting

For further troubleshooting, refer to the generic support pages.
