

The Ur-Quan Masters

The Ur-Quan Masters (UQM) is an open-source port of Star Control II (1992), a classic action-adventure game by Toys for Bob. It combines space exploration, diplomacy, resource gathering and real-time ship combat in an open-ended galaxy. The game is widely regarded as one of the greatest games ever made and was released as open source by the original creators in 2002. This system scrapes metadata for the “ports” group(s) and loads the uqm set from the currently selected theme, if available. Grouped with the “ports” group of systems.
